DETAILED ACTION

Claim Rejections - 35 USC § 101

1. Claims 1-10 are rejected under 35 U.S.C. § 101 because the disclosed invention is inoperative and therefore lacks utility.

It is not clear to the examiner how is water pump (9) powered in order to get water from tank (2) and generate a water jet to rotate blades (10) of turbine (11) to power generator (12).

2. Claims 1-10 are rejected under 35 U.S.C. § 101 because the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility.

It is not clear to the examiner how would the water jet expelled by the water pump (9) would be capable of generating enough power to move arm (5) when generator (20) is engaged. In other words, the operation of generator (20) is determined by rotation of wheel (5), which will require water pump (9) to produce a larger water volume than the amount of water required to move generator (20) alone by itself due to mechanical losses and the weight of the system.

3. Claims 1-10 are also rejected under 35 U.S.C. § 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
